Environmental Policy

Bowmer & Kirkland Limited has a commitment to promote the conservation and sustainable use of natural resources, to minimise environmental pollution and to promote energy efficiency in all of its own construction activities and those of its sub-contractors.

It is the general policy, therefore, to:

- Minimise the extent of the environmental impact of field operations
- Liaise with our Clients on potential environmental issues and work with them to address issues and concerns.
- Develop measures and set targets for our environmental management performance
- Make regular reviews of this policy and our performance, and institute improvements where possible
- Provide appropriate training for our employees
- Put in place procedures and support information that enable compliance with laws, regulations and codes of practice relating to environmental issues
- Foster a constructive working environment through liaison with government as well as with other interested parties
- Conserve energy through minimising consumption and maximising efficiency
- Minimise the use of materials which may be harmful to the environment
- Where possible, promote efficient purchasing which will both avoid waste and which will allow for materials to be recycled.
- Employ sound waste management practices
- Promote prudent environmental practice in design
- Recognise and encourage the contribution every employee can make towards improving the Company's environmental performance

This Environmental Policy, together with our Management System, will be periodically reviewed to ensure their continued suitability within an ever-changing industry.

Signed:

J N Kirkland - Chairman
